

Delta fits within the new trend known as 'Industrial Luxe' which simply means products that are normally associated with industry are now being redesigned and rethought to make contemporary pieces for the home. Delta takes its lead from concrete so has a polished concrete look mixed with metal. It features SmarTops® technology which is durable, heat, scratch and stain resistant, a must for today's busy homes. The table options are fixed, rectangle extending or the new round extending, allowing additional guests if entertaining. It has an easy glide mechanism making opening the butterfly extension very easy. The edges of the table are rounded for a more elegant feel.
